Profile Summary

Computer Science undergraduate with strong foundations in **Java, Data Structures, and Object-Oriented Programming**. Skilled in **full-stack web development (MERN)** with hands-on experience in building scalable and responsive web applications. Proficient in developing backend applications and integrating frontend with backend systems. Passionate about problem-solving, writing clean and efficient code, and continuously learning new technologies to build real-world solutions.

Education

Chitkara University, Himachal Pradesh
Bachelor of Engineering – Computer Science

2023 – 2027
CGPA: 9.12/10

Technical Skills

Programming Languages: Java, JavaScript
Web Development: HTML5, CSS3, Tailwind CSS, React.js
Backend: Node.js, Express.js, Basic Spring Boot
Data Structures & Algorithms: Arrays, Linked List, Stack, Queue, Recursion
Database: MongoDB, SQL
Core Computer Science: Object Oriented Programming
Tools: Git, GitHub, VS Code, Postman

Projects

CodeQuick – Coding Platform (Major Project)
Live Demo — GitHub

2025

- Developed a full-stack coding platform similar to LeetCode using MERN stack.
- Implemented secure authentication and authorization using JWT.
- Built features for coding problems, submissions, and user progress tracking.
- Designed responsive UI using React and Tailwind CSS.
- Structured scalable backend applications for efficient performance.

AskPDF AI

2026

- Developed an AI-powered application that allows users to interact with and ask questions about PDF documents.
- Implemented PDF processing and document-based question answering using Generative AI.
- Built a responsive user interface for uploading documents and interacting with the AI system.
- Integrated backend services to process PDF documents and generate relevant responses using Generative AI.
- Stored vector embeddings in MongoDB Atlas for semantic search and retrieval.

Certifications

- C++ Programming (OOP & Data Structures) – Infosys Springboard
- Java Programming Basics – Infosys Springboard
- Database Management Systems – Infosys
- Introduction to Modern AI – Cisco
- Cybersecurity Essentials – Cisco

Activities

- Regularly practicing Data Structures and Algorithms.
- Actively building and exploring full-stack web development projects.
- Maintain GitHub repositories with version control practices.

Soft Skills

Problem Solving — Communication — Teamwork — Time Management
